To Whom It May Concern

We are impressed with TNO Systems's engineered best-in-class Globe 3 ERP Business Management System - its web-based capability, user-friendly functionality, and reasonable cost of implementing the system.

During the project implementation, the Globe3 consultants were able to understand our unique requirements and demonstrated proven capabilities and skill-sets in dealing with our multi-company, multi-currency, multi-location requirements.

The Globe3 ERP business management system has helped us to increase our business efficiency in the distribution industry, expanded our Finance team's ability to data-mine from its database to generate various management reports with ease and timely for review and decision-making.

With the growth of our businesses, the scalability and continuous improvements in Globe3 has enabled it to match our business growth.

Yours faithfully,
